Page Wide Media Application Guide

Que Media's Page Wide products are designed to work with all high speed print systems. Our two most common coatings are matte porous and glossy microporous. Both coatings are designed to hold a large ink load in a very stable format to avoid ink bleeding and protect the ink from water damage or smearing.

Many of our matte coatings are compatible with UV printers as well.

This Guide is designed to simplify the process of choosing the right product for your high speed printer.

- QM-WRTYK **Matte WR instant dry tyvek**
- QM-DSWRPP-P **Everyday matte stay-flat polypropylene**
- QM-STMPP **Everyday satin microporous RC instant dry photo paper**
- QM-PPGWRP **Everyday gloss high density microporous polypropylene**
- QM-DMPETF **Double matte PET film**
- QM-WRBLF **Matte backlit polyester film**
- QM-PROWRPPAD **Professional high speed matte polypropylene w/ permanent adhesive and anti-slip PET liner**

QEs & As

Q: Are any of Que Media's products compatible with other printer inks systems?

A: Yes, many of Que's products are cross platform compatible. Take a look at the ink icons to the right. These icons will appear throughout this guide to all media that applies.

Matte WR instant dry tyvek

APPLICATIONS

- Posters & Presentations
- Technical Drawings
- Banners
- Trade Shows
- Maps

QM-WRTYK

Que Media Tyvek® by Dupont® is durable, tear resistant, and extremely lightweight. Ultra smooth surface for HD graphics and rich color gamut. Our coating is formulated specifically for high speed print systems. Super fast dry times to keep up with the output of these new print systems.

Tyvek® is a registered trademark of Dupont

Everyday matte stay-flat polypropylene

Matte stay-flat
polypropylene

QM-DSWRPP-P

High Opacity • Great for Posters and Presentations
Increased Durability • Great for Event Displays
Instant Dry Coating • Great for Banners
Smudge Resistant • Great for Photo Enlargements
Water & Tear Resistant • Great for POP Displays

APPLICATIONS

- Banners
- Posters & Presentations
- Photo Enlargements
- POP Displays
- Event Displays

QM-DSWRPP-P

This 8 mil polypropylene has a specially formulated coating on the backside to force the media to lay flat on both sides. DSWRPP-P has good tear resistance and its microporous top coating gives it the ability to reproduce rich, accurate color. This is an ideal product for indoor signage.

Double matte PET film

APPLICATIONS

- CAD Drawings
- Blueprint Overlays
- Maps
- Architectural Designs

Double matte PET film QM-DMPETF

Translucent • Great for Blueprint Overlays
 Stable & Durable • Great for Maps
 Instant Dry Coating • Great for High Speed Production
 Smudge Resistant • Great for CAD Drawings
 Easy to Handle • Great for Architectural Designs

QM-DMPETF

This extremely durable, yet semi-soft PET film is great for printing architectural designs and blueprint overlays. Much more durable than traditional vellum, this PET film will hold up better in rugged situations and job sites. Can be written on with pen or pencil. Our coating is formulated specifically for high speed print systems.
